

*La città è un tutto interconnesso.
È costituita da un hardware e un software:
l'uno non può esistere senza l'altro.
Tra le professioni essenziali vi sono figure di raccordo
come gli specialisti delle rigenerazioni urbane*

C. Landry, City Making. The art of city Making

Company CV

1. Company profile

identity

KCity - a private corporate- works with public institutions, private and third sector offering professional services within the field of the urban regeneration, defining and managing projects, programmes and initiatives.

mission

KCity is composed by qualified professionals with multidisciplinary backgrounds to approach the urban development with a scientific and integrated attitude and to manage the variety of aspects embedded within sustainable and qualitative urban transformations.

approach

KCity implements a strategic approach posing the attention onto the valorisation of available resources and onto the integration of multiple interests. This leads to the generation of stakeholders' partnerships (public local entities, private profit sector and the third sector which could share challenge and cooperate) around the arisen opportunities represented by the urban voids which could host new functions: dismissed areas, underused buildings and abandoned areas.

services

Feasibility studies and strategic plans – In the initial phase Kcity defines strategic specific contents for urban regeneration plans and projects, managing the creative process and developing deep technical insights and researches to verify the feasibility.

Technical assistance and education – Kcity supports actors and bodies designing regeneration initiatives, offering technical assistance and strategic consultancy in addition to actors specific training activities.

Project management and evaluation – KCity supports the realization of regeneration projects, taking charge of scheduling and organizing the operational and specific planning, implementing the activities, leading strategic evaluation activities useful to address towards impactful outcomes.
